

# Support the Community Circle

## Help Us Complete the Circle

The Community Circle anchors the campus center and while it functions as the drop-off/pick-up site for our youth, it is also a central plaza that is traversed on foot, sometimes many times a day, as it connects many of our facilities. The Circle will improve the flow of traffic into and off the campus and will clearly define the “front door” of the campus, including the main administration building. Earth-toned pavers in key sections will provide a strong surface for vehicles while injecting warmth and a more pleasing visual aesthetic into the environment than grey concrete alone.

### The Community Circle domain components:

- Demolishing existing paving, vegetation and grading
- Building a planter wall
- Installing new pavers
- Creating a concrete band and walkways
- Planting shrubs and ground covers
- Planting 3 mature trees (36" box)
- Planting 1 central tree (72" box)
- Installing irrigation
- Value: \$100,000
