

# Support the Friendly Shelter

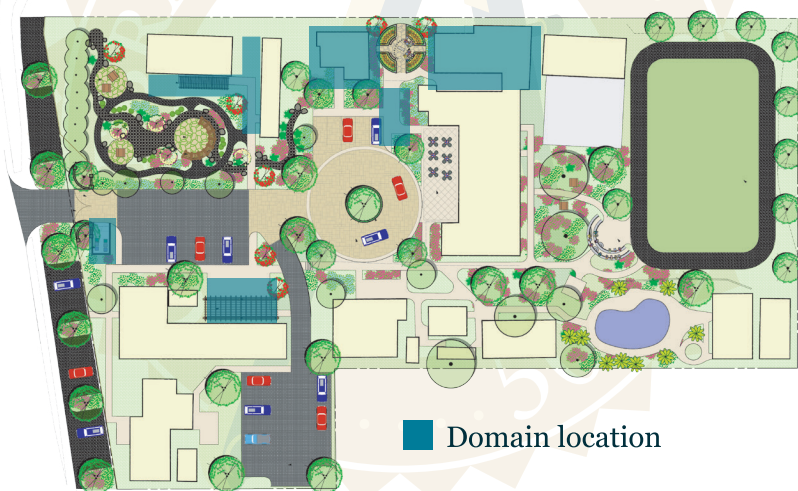

## Friendly Shelter domain components:

- Building a patio cover and two trellises
- Painting and installing walkways for two buildings by the healing garden
- Upgrading the buildings' windows and doors
- Building walls for a trash enclosure
- Pouring concrete
- Installing gates
- Value: \$50,000

## Create Safe Spaces with Us

A key aspect of this domain is to create a shaded patio, allowing staff and youth to enjoy the warmth of the outdoors without the heat and glare of intense sunshine. Flowering vines will enhance the patio covering while adding visual appeal to the frontage of one of our buildings. The value of two other components in this domain lie more so in their ability to conceal, rather than highlight their contents. This is the construction of two trash enclosure areas, in order to secure waste from pests and camouflage the eyesore created by waste bins.
