Create a Place for Belonging

As the hub of New Haven’s campus activity, the Central Building houses classroom and dining facilities. This domain project will center around improving the external aspects of the building, including a new coat of paint, new windows and adding the piece-de-la-resistance, a fabulous al fresco dining area. Both aesthetic and energy improvements will result from this upgrade, and the new outdoor dining area will also function as a safe and comfortable place for youth to wait for their ride home.

The Front Porch domain components:

- Relocating the a/c units to the back of the building
- Restructuring the school facade
- Creating slated pillars on the exterior
- Upgrading the windows and doors
- Painting and installing new siding
- Demolishing existing vegetation and grading
- Installing concrete walks
- Planting new shrubs and ground covers
- Planting 2 mature trees (24” box)
- Installing new irrigation
- Value: $60,000
